COMPONENTS:

Upper:

Water repellent and tear resistant Action Nubuck leather + collar in abrasion resistant fabric
Breathable mesh fabric.

Upper lining:

Toe-cap:

- Steel toe cap with large internal space for increased comfort for the toes
- 200 Joule impact protection
- 1500Kg compression protection

Anti-puncture insole:

Made of anti-perforation, absorbent, abrasion- and flaking resistant fabric.

Sole:

Made of antistatic bidensity polyurethane, directly injected onto the upper with electrostatic charge dissipation capacity.

Outsole:

High density, non-slip (SRC), resistant to abrasion and to hydrocarbons.

Midsole:

Low density, comfortable and shockproof.

MODEL DESCRIPTION:

Low shoe with anti-puncture fabric.
Upper in high quality water repellent and tear resistant Nubuck.
Breathable mesh fabric lining.
Antistatic footwear with anti-slip SRC and anti-shock sole.
Ample internal space for toe comfort.

RECOMMENDED USES

Handcraft, light industry, logistics, construction.

MAINTENANCE:

Make sure the shoes are in good condition before each use.
Regularly clean them. Do not use aggressive products such as petrol, acids and solvents that could affect their quality, safety and durability.
